This sheet of Paper folds into a small book. Here is how:

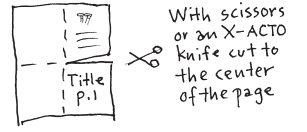

- Print this document
- 2-sided
- long-edge binding
- Page Scaling: None or 100%

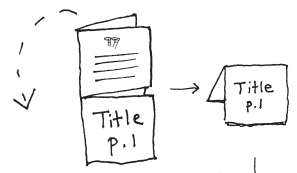

with scissors or an X-ACTO knife separate instructions from the book pages

two creases divide the page into 4 equal parts

fold in half one more time and then fold the top backwards to make a book

If you wish, you can place a strip of tape around the spine

VOILA, the little 6-page book is complete!
